OBJECTIVE

Aspiring Software Developer with a solid foundation in programming, secure coding principles, and system security. Personal development projects, contributing to application design, debugging, and performance optimization. Seeking an opportunity to contribute analytical skills, problem-solving abilities, and a security-focused mindset to enhance organizational resilience and innovation.

EDUCATION

MSc -- COMPUTER SCIENCE “Alagappa University, Karaikudi, Tamil Nadu”. **2023 – 2025** CGPA: 7.10.

BSc -- COMPUTER SCIENCE “Government Arts and Science College of Karur, Tamil Nadu”. **2020 – 2023** CGPA: 7.30.

TECHNICAL SKILL

FRONT END: HTML | CSS | React JS.

LANGUAGE: Advance Java | XML | DSA.

DATA BASE: MongoDB | MYSQL | PostgreSQL.

FRAME WORK: Spring Boot | Hibernate.

BUILD TOOL: Maven | Gradle.

TESTING TOOL: Selenium | JMeter.

CONCEPTS: API Design | Security Concepts | Ci/Cd Pipeline | Vision Control | LLD | System Design.

CYBER SECURITY: Blue Hat | VAPT | SIEM Tools | Kali Linux | Parrot OS | Burp Suit | Forensics Tools.

ADDITIONAL SKILL: Networking | Hardware | Operating System

SOFT SKILLS

Adaptability & Flexibility | Time Management and Good communication | leadership & decision making

EXPERIENCE

IMPOWER SOLUTIONS PVT LTD

SYSTEM ADMINISTRATOR

Apr 2026 – Currently Working

Chennai, Tamil Nadu, India.

INDUSTRIAL EXPERIENCE | AXI OPERATOR

Nokia Network private limit, Chennai. (Manufacturing)

Sep 2025 -Nov 2025

Chennai, Tamil Nadu, India.

CYBER SECURITY TRAINEE | INTERNSHIP

CSUITE TECH LABS.

Jan 2025 - Mar 2025

Coimbatore, Tamil Nadu, India.

SERVICE SHOP BASKAR TECH SECURITY

CCTV, GPS And Laptop Service.

Chennai, Tamil Nadu, India.

PROJECT

ADVANCED PERSISTENT THREAT (APT) DETECTION USING HONEYPOT

Developed Advanced Persistent Threat (APT) Honeypot Systems Integrating SSH, FTP, And Camara Traps with ELK Stack Dashboards to Capture, Analysis, And Visualize Attacker Behaviour in Real Time. Implemented Session Logging, IP Geolocation, And Automated Alerts to Enhance Threat Intelligence, And Pro Active Cybersecurity Defence.

ANTI-KEYLOGGER DETECTION SYSTEM

The Windows Keylogger and Anti-Keylogger Detection System Encompasses Both the Offensive and Defensive Aspects of Cybersecurity. This Project, Provides A Dual-Function Platform That Includes a Keylogging Module for Capturing and Analysis User Keystrokes, And an Anti-Keylogger Module That Detects and Mitigates Potential Keylogging Threats.

AI-POWERED FRAUD DETECTION SYSTEM FOR ONLINE TRANSACTION

This Project Development of a Web-Based Fraud Detection System That Leverages Machine Learning Techniques to Identify Suspicious Financial Transactions. With The Digital Payments and Online Banking, Financial Fraud Has Become Increasingly Sophisticated. Detecting Fraudulent Activities in Real-Time Is Crucial to Protect Users and Financial Institutions from Potential Losses.
